PROFESSIONAL SUMMARY

Senior Software Engineer with 6+ years of experience building production SaaS, CRM, real estate, and AI voice-agent applications with React.js, React Native, Node.js, TypeScript, Python, and PostgreSQL. Architected multi-tenant platforms with JWT authentication, role-based access control, and strict tenant isolation, and integrated Twilio, Telnyx, Stripe, and Razorpay into production workflows. Built AI voice agents using retrieval-augmented generation (RAG), knowledge-base embeddings, and Whisper speech-to-text, including an Arabic-language agent. Owned Docker-based CI/CD, DigitalOcean deployments, and Sentry monitoring, and automated enterprise business processes for one of the region's largest property developers.

CORE TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), Python, PHP, Java, SQL, HTML5, CSS3

Frontend: React.js, Next.js, React Native, Angular, Material UI, Bootstrap, SASS/SCSS, Responsive Design, Core Web Vitals

Backend: Node.js, Express.js, Python, Laravel, Spring Boot, REST APIs, WebSockets, Webhooks, JWT Authentication, Role-Based Access Control (RBAC), Multi-Tenant Architecture

Databases: PostgreSQL, MySQL, Redis, Data Modeling, Query Optimization, Indexing, Migrations

AI: AI Voice Agents, LLM Integrations, Retrieval-Augmented Generation (RAG), Knowledge-Base Embeddings, Whisper (Speech-to-Text), Arabic Voice Agents

Cloud and DevOps: Docker, CI/CD Pipelines, Coolify, DigitalOcean, AWS, Azure, Git, Sentry, Structured Logging, Health Checks, Uptime Monitoring

Integrations and Payments: Stripe, Razorpay, Twilio, Telnyx (Programmable Voice, SMS, WhatsApp Business), Practice-Management and Scheduling APIs

Engineering Practices: System Design, Software Architecture, Code Review, Agile/Scrum, Incident Triage, Root-Cause Analysis, Requirements Analysis

PROFESSIONAL EXPERIENCE

Senior Software Engineer (Senior Full Stack Developer)

TeraLeads | United Arab Emirates | Oct 2024 – Sep 2026

- Architected a multi-tenant AI voice-agent SaaS platform and companion React Native app, enabling businesses to manage inbound calls, appointments, leads, call records, and transcripts within isolated tenant environments.
- Engineered AI voice agents that answer callers from tenant-specific knowledge bases using RAG, embeddings, Whisper transcription, and real-time WebSockets, automating inbound call handling for businesses, including in Arabic.
- Owned TeraCRM end to end with React.js, Node.js, TypeScript, and PostgreSQL, one of three production products in the portfolio, centralizing sales pipelines and lead management in a single system.
- Integrated Twilio and Telnyx voice, SMS, and WhatsApp Business messaging, Stripe and Razorpay payments, and external scheduling platforms through webhook-driven pipelines, connecting communication, payment, and appointment data in one workflow.
- Hardened backend services with JWT authentication, RBAC, strict tenant isolation, Redis caching, and optimized PostgreSQL connection handling, protecting each business's data while serving concurrent tenants.
- Established Sentry monitoring, structured logging, health checks, and Docker-based CI/CD through Coolify on DigitalOcean, and defined KPIs (bug escape rate, MTTR, uptime, sprint delivery) to make release quality measurable.

Tech Stack: React.js, React Native, TypeScript, Node.js, Python, PostgreSQL, Redis, REST APIs, WebSockets, Twilio, Telnyx, Stripe, Razorpay, RAG, Whisper, Docker, Coolify, DigitalOcean, Sentry, Git, CI/CD

Senior Software Engineer

DAMAC Properties | Dubai, United Arab Emirates | Aug 2023 – Oct 2024

- Automated property-sales commission processing with configurable business rules, structured sales-data entry, and detailed reporting, replacing error-prone manual spreadsheet calculations across the sales organization.

- Built a brokerage platform supporting property listings, client management, and transaction tracking, giving brokers, buyers, and sellers one shared channel for communication and deal progress.
- Designed a rental guarantee scheme application that streamlined guarantee administration and helped ensure landlords received timely payments in the event of tenant default.
- Streamlined IT asset procurement with a request-and-approval workflow that routed requests automatically to the right approvers, replacing manual routing and reducing request processing time.
- Created a candidate-to-employee onboarding system with multi-stage approvals and three distinct process flows for GCC, UAE, and international hires, one of five enterprise applications delivered for sales, HR, and IT.

Tech Stack: React.js, TypeScript, JavaScript, Material UI, HTML5, SASS, REST APIs

Full Stack Developer (promoted from Software Engineer)

Profecia Links | Pune, India | Nov 2019 – Jul 2023

- Contributed to Arafx, a configurable low-code SaaS platform for workflow management, CRM, and asset tracking, using React.js, Next.js, SASS, and Spring Boot so clients could configure rather than code solutions.
- Developed Starkey, a social media management SaaS platform unifying five networks (Facebook, Instagram, Twitter, LinkedIn, YouTube) with content scheduling and audience engagement tracking, using PHP, Laravel, Angular, and MySQL.
- Delivered Rise Tool, a data-driven school-selection platform, and Viograh, a classifieds and family-tree platform with full account management, using React.js and Laravel.
- Collaborated with cross-functional teams to build reusable features, integrate backend services, and resolve production issues across Agile/Scrum sprints, supporting reliable client releases.

Tech Stack: React.js, Next.js, Angular, Laravel, PHP, Spring Boot, Java, MySQL, SASS, REST APIs

EDUCATION

Master of Computer Science, Computer Engineering | Savitribai Phule Pune University, India | Mar 2021 – Mar 2023

B.Sc. Computer Science, Computer Programming | Savitribai Phule Pune University, India | 2017 – 2020

LANGUAGES

English (Professional), Hindi (Native)
